Subject: Last weeks meeting

Good Afternoon, Just to say thank you for last week's productive meeting. I was pleased that a branch of the cycle track is proposed to come over the A55 with the overpass. Will this also be the case that the new iron bridge is to be a ramp, rather than steps currently employed, to be disabled friendly? My only concern is that both are adequately signposted to and from the town centre etc. The other topic covered was the existing business advertising sign, which is to be moved, renovated and when re sited, and to be illuminated. I have mentioned the gateway feature to the local industrial historical group, (Penmaenmawr and Welsh Granite Industrial Heritage Railway), about the renovation of one of the quarry wagons for the feature. I am sure the quarry would supply a suitable block of Granite, which would then need some inscription such as 'Penmaenmawr, Quarry Town' carved onto it. And it too would need some form of illumination. These ideas are to ensure that the new road design gives the local businesses every opportunity to benefit from passing A55 traffic, as well as to enhance the aesthetics of the scheme. Many Thanks, Cllr. Ken.
