"As Vice Chair of the Assoc, here are the Objections and Observations of the 300 members have instructed me to submit 1 GLAN Yr AFON RD The traffic will obviously increase dramatically.If not double. The only road in the village to have a fatality It has two large caravan parks and two footpaths leading on to it and it's a bus route. The scheme widens the road up to the first house after that they is approx 200mts without a pavement on either side exactly where the fatality took place To glibly say this is outside the scheme is totally disrespectful when it's the scheme that's causing the extra problem. 2 THE IRON BRIDGE This needs to be extended over the extremely fast new road to allow children/cyclists safe access to the beach and National Cycle Path as they have now 3 LOSS OF LAND ON FOOTBALL FIELD This is the only area of land available for public recreation purpose We also believe that DWYGYFYLCHI has the lowest amount of public recreational space in CONWY, well below recommend for the well-being of residents Yet this scheme takes between a third and half of this green area. When you look at the scheme it appears that we are given an area of land in mitigation, however this land is of very poor quality with regard to being extremely muddy and its irregular shape Then looking further into the project you find that this land is not being given as mitigation to the residents but in EXCHANGE to yet another Building Developer and farmer. We are then told (we can't CPO land and give it to another) YES you can give the Developer/Farmer the cash then sell it to the community for a nominal fee. JOB DONE They are other points Rat-Run etc which might have resolved but meeting closed so RANT On behalf of all the residents of DWYGYFYLCHI (poll stations 7 May) random selection The final consultation was shambles Couldn't get Webinar Haven't got broadband 40 question still to answer close meeting HA Rubbish answer no chance follow up Usually stitch up"
